ABOUT

Full-Stack AI Engineer and CS student (4.0 CGPA) specialized in building high-performance AI Agents, scalable RAG architectures, and production backends. Beyond code, I spent a decade competing as a National Swimmer (winning 10+ Medals) and spend my free time playing chess. Whether optimizing sub-250ms vector search or orchestrating workflows with n8n, I bring discipline, speed, and strategic problem-solving to complex software challenges.

EXPERIENCE

Independent Freelancer Present
Full-stack AI Engineer Remote

- Delivered 5+ full-stack AI applications integrating LLMs, autonomous AI Agents, vector databases (pgvector/Qdrant), and modern TypeScript frontends with 100% on-time completion.
- Engineered scalable FastAPI backends supporting sub-200ms average response times and zero-downtime production deployments.

MINDGIGS Dec 2025 – Feb 2026
Python Developer Intern Peshawar, Pakistan

- Engineered high-throughput REST APIs using FastAPI and asyncio, boosting request throughput by ~40% with strict Pydantic schema validation.
- Integrated local Intel® Small LLMs (SLMs) and developed Dockerized data scraping pipelines processing 20k+ daily records.

KP Swimming Association Present (Seasonal)
Swimming Coach & IT Manager (Former National Swimmer) Peshawar, Pakistan

- Represented Khyber Pakhtunkhwa (KP) province for 10 years as a National Swimmer, winning 10+ Medals including Gold at the National Junior Swimming Championships.
- Served as in-house IT Manager, digitizing database records for 200+ provincial athletes and automating administrative workflows, cutting processing time by 90%.
- Coached and mentored 30+ swimmers by designing structured training programs, resulting in multiple regional championship podium finishes.

PROJECTS

Rednote (Jun 2026) Python, AI Agents, pgvector, PostgreSQL, TypeScript, Docker, CI/CD
[Live Demo](#) • [Source Code](#)

- Engineered a full-stack RAG document assistant with autonomous AI Agents and pgvector semantic search, achieving sub-250ms query response times across 10,000+ indexed chunks.
- Automated an end-to-end document ingestion pipeline (upload, chunking, embedding) with JWT authentication and guest-to-registered user conversion.
- Containerized application with Docker and automated GitHub Actions CI/CD pipeline, reducing deployment time to under 3 minutes.

Async Web Scraper (Apr 2026) Python, n8n, PostgreSQL, TypeScript, Docker
[Live Demo](#) • [Source Code](#)

- Developed an async data pipeline processing 50k+ raw web pages into PostgreSQL with a 99.2% extraction success rate via Groq LLM rate-limiting and n8n workflow integration.
- Built a TypeScript monitoring dashboard with 3s interval polling, reducing manual verification overhead by 90%.

EDUCATION

University of Agriculture, Peshawar Oct 2024 – Oct 2028 (Expected)
Bachelor of Science in Computer Science (BSCS) CGPA: 4.0

Coursework: Programming Fundamentals, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Systems

TECHNICAL SKILLS

Languages	Python, TypeScript, C++, C, Bash, JavaScript, SQL (PostgreSQL)
Backend	FastAPI, SQLAlchemy, Pydantic, Asyncio, RESTful API Design
AI/LLM	AI Agents, OpenAI API, Groq API, LangChain, pgvector, LangSmith, RAG systems, Prompt engineering
Frontend	HTML5, CSS3, JavaScript, TypeScript, React
DevOps & Tools	Docker, Git, GitHub Actions, CI/CD, n8n Automation, pgAdmin, Linux, Hugging Face

CERTIFICATIONS

CS50X: Introduction to Computer Science (Harvard University) [Verify](#) Feb 2026
CS50P: Introduction to Programming with Python (Harvard University) [Verify](#) Oct 2025
